

## UNIT: 7 - PARTS OF COMPUTER

CLASS: VI

SUBJECT: SCIENCE

### I. Choose the correct answer

- Which one of the following is an output device?  
a. Mouse      b. Keyboard      **c. Speaker**      d. Pen drive
- Name the cable that connects CPU to the Monitor  
a. Ethernet      **b. Power Cord**      c. HDMI      d. USB
- Which one of the following is an input device?  
a. Speaker      **b. Keyboard**      c. Monitor      d. Printer
- Which one of the following is an example for wireless connections?  
**a. Wi-Fi**      b. Electric wires      c. VGA      d. USB
- Pen drive is device.  
a. Output      b. Input      **c. Storage**      d. Connecting cable

### II. Match the following

- |              |   |                     |
|--------------|---|---------------------|
| 1. VGA       | - | Connecting cable    |
| 2. Bluetooth | - | Wireless connection |
| 3. Printer   | - | Output device       |
| 4. Keyboard  | - | Input device        |
| 5. HDMI      | - | LDMI                |

### III. Give short answer

#### 1. Name the parts of a computer.

- ❖ Input unit (keyboard, mouse, scanner),
- ❖ Central Processing Unit (CPU),
- ❖ Output unit (monitor, printer, speaker) are the parts of computer.

#### 2. Bring out any two differences between input and output devices.

##### Input device:

- ❖ It helps to send the data and commands for the processing.
- ❖ Example: Keyboard, Mouse, Scanner, Barcode reader, web-camera, Microphone - mic

##### Output device:

- ❖ The output unit converts command received by the computer in the form of binary signals into easily understandable characters.
- ❖ Example: Monitor, Printer, Speaker, and Scanner.
